Black epoxy

It is recognized in the market due to its **high resistance** and versatility in both heavy duty and everyday solutions. It can fix vehicle parts, metalworking, ceramics, glasses, as well as household items. It is used by mechanics, blacksmiths, brass workers, carpenters, students, housewives, etc.

It can be used on: glass, plastic, ceramics, fiberglass, slab, metal, aluminum, copper, wood, MDF.

Withstands up to **550 lbs** deadweight.

Withstands up to **572 °F** of temperature.

Underwater glue. It **dries in 30 minutes** in the sun or 1 hour and 30 minutes in the shade.

Once applied, the mixture of the components is black.

PRESENTATIONS:

35,27 oz (1 kg)

White epoxy

PEGATANKE®, in its need to innovate and respond to a demanding market, developed the **White epoxy**, a glue that can be used on light-colored surfaces when it is necessary to preserve their aesthetics. It is ideal for window frames, speedboats, and any fiberglass material. It has a wide variety of uses.

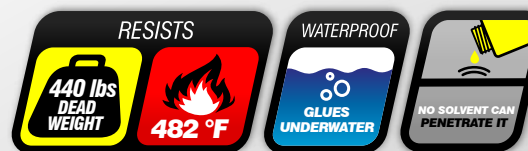

It can be used on: glass, plastic, ceramics, fiberglass, slab, metal, aluminum, copper, wood, MDF.

Withstands up to **440 lbs** deadweight.

Withstands up to **482 °F** of temperature.

Underwater glue. It **dries in 45 minutes** in the sun or 1 hour and 45 minutes in the shade.

Once applied, the mixture of the components is white.

PRESENTATIONS:

35,27 oz (1 kg)

Steel epoxy

It was developed to be used as adhesive or anchor mortar between different construction materials. This new formula offers longer lifespan for jobs subjected to extreme temperature and stress resistance conditions (ideal for industries or heavy-duty jobs). It can be used to bond dry parts as well as those fully underwater.

It can be used on: glass, plastic, ceramics, fiberglass, slab, metal, aluminum, copper, wood, MDF.

Withstands up to **882 lbs** deadweight. It

Withstands up to **1292 °F** of temperature.

Underwater glue. It **dries in 30 minutes** in the sun or 1 hour and 30 minutes in the shade.

Once applied, the mixture of the components is dark gray.

PRESENTATIONS:

35,27 oz (1 kg)

Clear epoxy

Clear epoxy is a high-quality epoxy glue, designed for those jobs where we do not want to see the glue trace, providing users with a more aesthetic finish.

It withstands high tensile strength and high temperatures. This makes the Clear epoxy the unique welding with these capacities on the market.

It can be used on: glass, plastic, ceramics, fiberglass, slab, metal, aluminum, copper, wood, MDF.

Withstands up to **1543 lbs** deadweight.

Withstands up to **932 °F** of temperature.

Underwater glue. It **dries in 45 minutes** in the sun or 1 hour and 45 minutes in the shade.

Once applied, the mixture of the components is clear.

PRESENTATIONS:

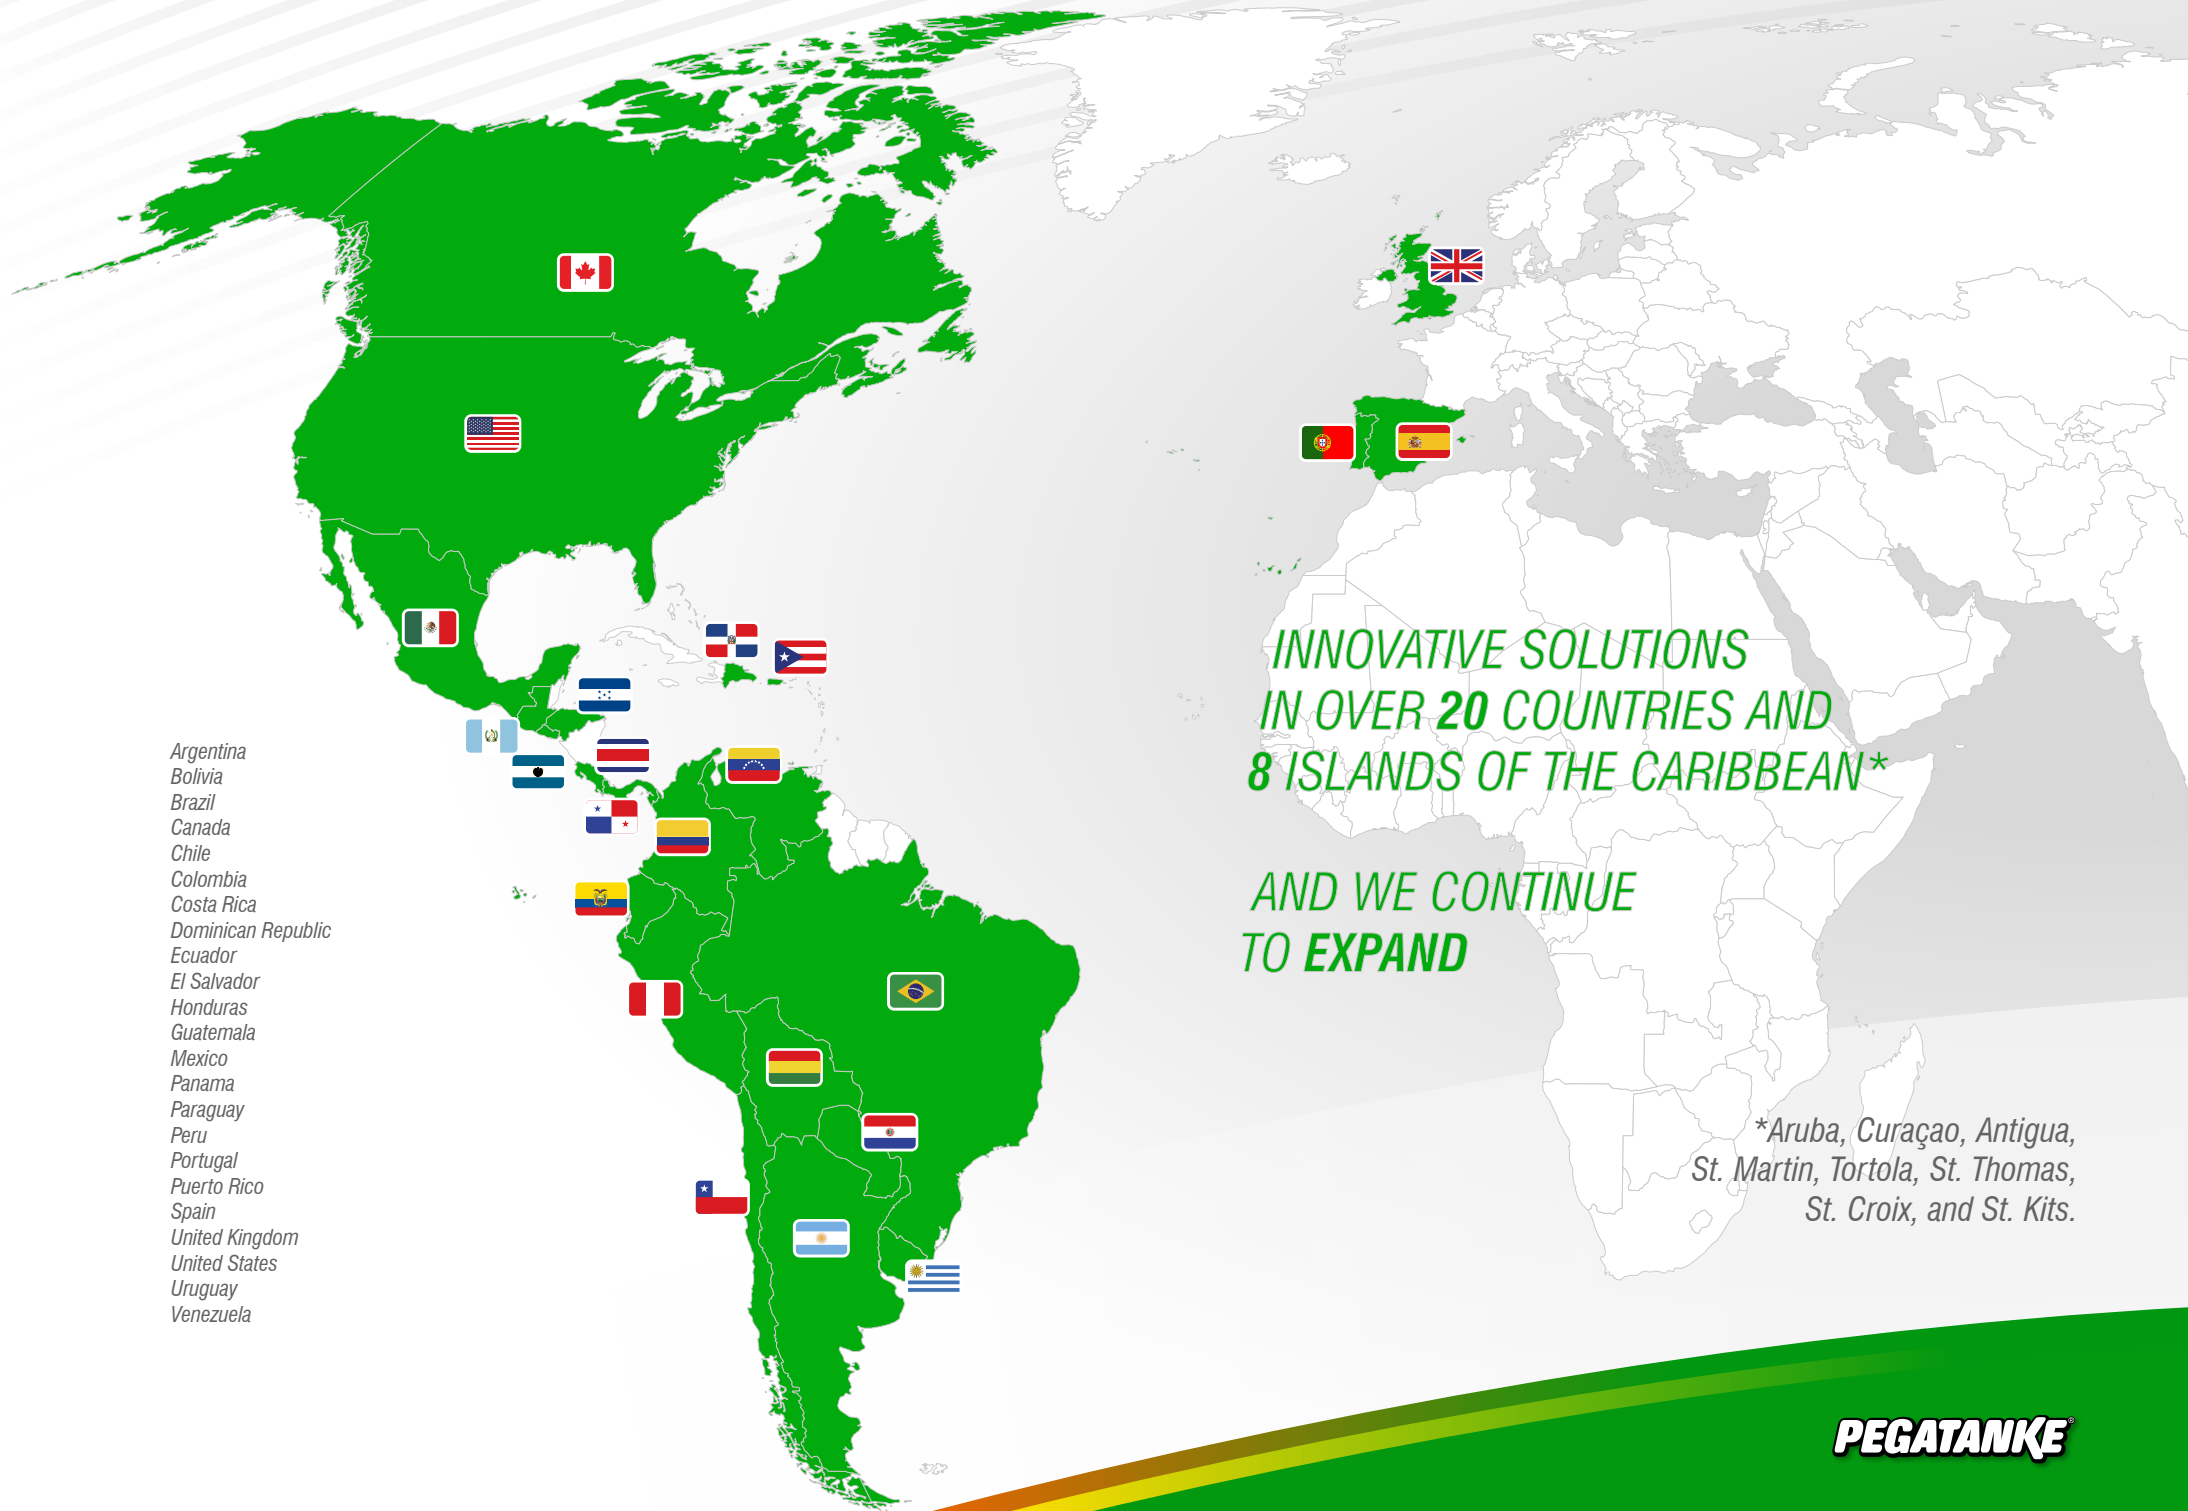

35,27 oz (1 kg)

PEGATANKE®
